THINK INSIDE THE BOX!

KILLER SUDOKU

It's tougher than it looks!

ON SALE NOW!

SUDOKU 数独

It was no coincidence that the opening of the Beijing Summer Olympics took place at 8pm on the eighth day, of the eighth month, 2008. The number 8 is very lucky in Chinese culture because it sounds similar to the Chinese expression for 'prosper' or 'fortune'.

All over the world people attach both good and bad fortune to numbers. In Japan the pronunciation of the number 4 is similar to that of the Japanese word for 'death', so this room number is often skipped in hospitals and hotels. Similarly, Western cultures have a problem with the number 13. Triskaidekaphobia has led to many North American building blocks without a 13th floor and people often fear Friday the 13th.

The number 7 has always been considered lucky, probably because of its religious connections.The number 2 also has positive ramifications: there's an Asian saying that 'good things come in pairs', and an old English rhyme begins 'one for sorrow, two for joy…'. Whatever your thoughts, the numbers in these Sudoku will only bring you good challenging puzzle.

Happy puzzling, *Ariane*

Guest puzzle **Knossos** is on pages 32-33. Visit www.puzzler.com for an encyclopedia of all our puzzles.

1 COMPETITION

For your chance to win £1,000 in cash, solve this puzzle and follow the instructions to find a hidden word! Then, complete the form and send it to Grand Cash Competition 12530, 69 Station Road, Redhill, Surrey, RH1 1EY. Closing date is July 26, 2017. See page 81 for full terms and conditions. Good luck!

We've introduced a fun twist to our prize puzzle! Each digit in this Sudoku represents a letter (see table above). Solve the Sudoku to reveal which four digits appear in the highlighted cells. Reading from top to bottom, the correlating letters to these four digits spell out a word. This word is the competition solution.

How To Solve Sudoku

Place a digit from 1-9 in each empty cell so that each row, each column and each 3x3 block contains all the digits from 1-9.

Solving tip: stepping stones

As the same digit can't fall in the same row or column as itself, by focusing on a single digit in a 3x3 block (eg. 7 in the middle-right 3x3 block of this example) there often remains only one place for a digit to go.

Solving tip: row, box and column

It is possible to zone-in on a single cell and, by taking account of the other numbers in the row, column and 3x3 block in which it appears, identify the digit that must appear in that cell, eg. only an 8 can go in the highlighted cell of the example.

Solving tip: exceptions

Sometimes, you'll need to consider which numbers cannot go in certain cells, eg. look at the central 3x3 block at the bottom of the example. We know what digits must go in the empty cells, but we don't yet know the order. But, this information can be used to help fill the other blank cells along this row (5 and 7).

Sudoku is simple to learn, requires no calculations, and provides a surprisingly wide variety of logical situations. Good luck!

9	5	4	6	8	2	3	7	1

Solution.

Killer Sudoku

The normal rules of Sudoku apply. In addition, the digits in each inner shape (marked by dots) must add up to the number in the top corner of that box. No digit is repeated in an inner shape.

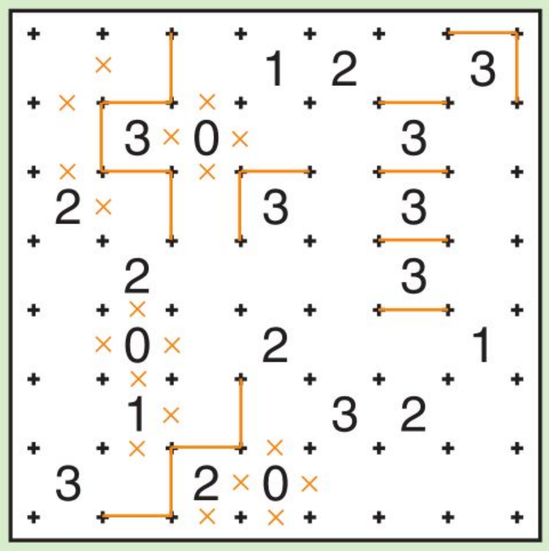

Extract of a Killer Sudoku.

Remember:

- The numbers in each row, each column and each 3x3 block must always add up to 45. (1+2+3+4+5+6+7+8+9=45.)
- For some inner shapes, only one combination of digits will be possible, eg. a 1 and 3 in a two-cell 4-sum.
- Don't forget the basic rules of Sudoku. It's easy to get tangled up in sums when the standard rules will get you there.

Loop the Loop

Connect adjacent crosses with vertical or horizontal lines so that a single loop is formed with no crossings or branches. Each number indicates how many lines surround it, while empty cells may be surrounded by any number of lines.

Solving tips:

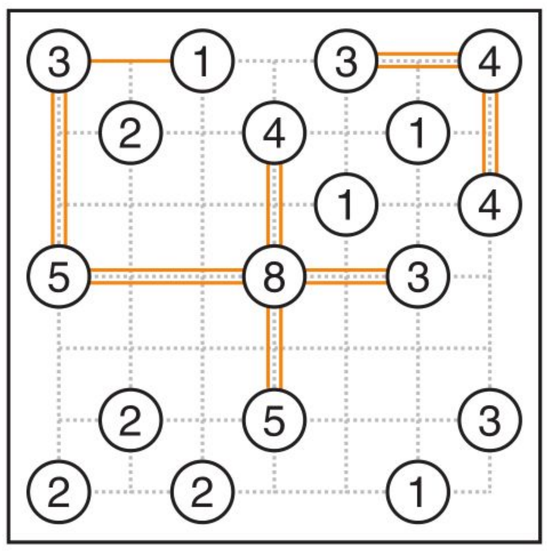

- Mark gaps with an x, between crosses you know cannot be linked, eg. around 0s.
- To create a single loop, the line must always be extended. Certain patterns in the positioning of clues will set you on your way, eg. where a 3 is adjacent to a 0 or adjacent 3s.

Bridges

Each circle containing a number represents an island. The object is to connect each island with vertical or horizontal bridges so that:

- the number of bridges equals the number inside the island;
- there is a continuous path connecting all the islands.

There can be up to two bridges between two islands. Bridges cannot cross islands or other bridges.

Solving tips:

- Start with 8-islands (the maximum number of bridges an island could have).
- Islands in corners are restricted.
- Each newly placed bridge limits the options for surrounding islands.

49 Tatami

Like Sudoku, Tatami will challenge the versatility of the solver.

The digits 1-5 must appear **twice** in each row and column, and **once** in each inner shape. The same digits cannot be placed in cells that share an edge, but can be placed in diagonally adjacent cells.

GUEST PUZZLE: KNOSSOS

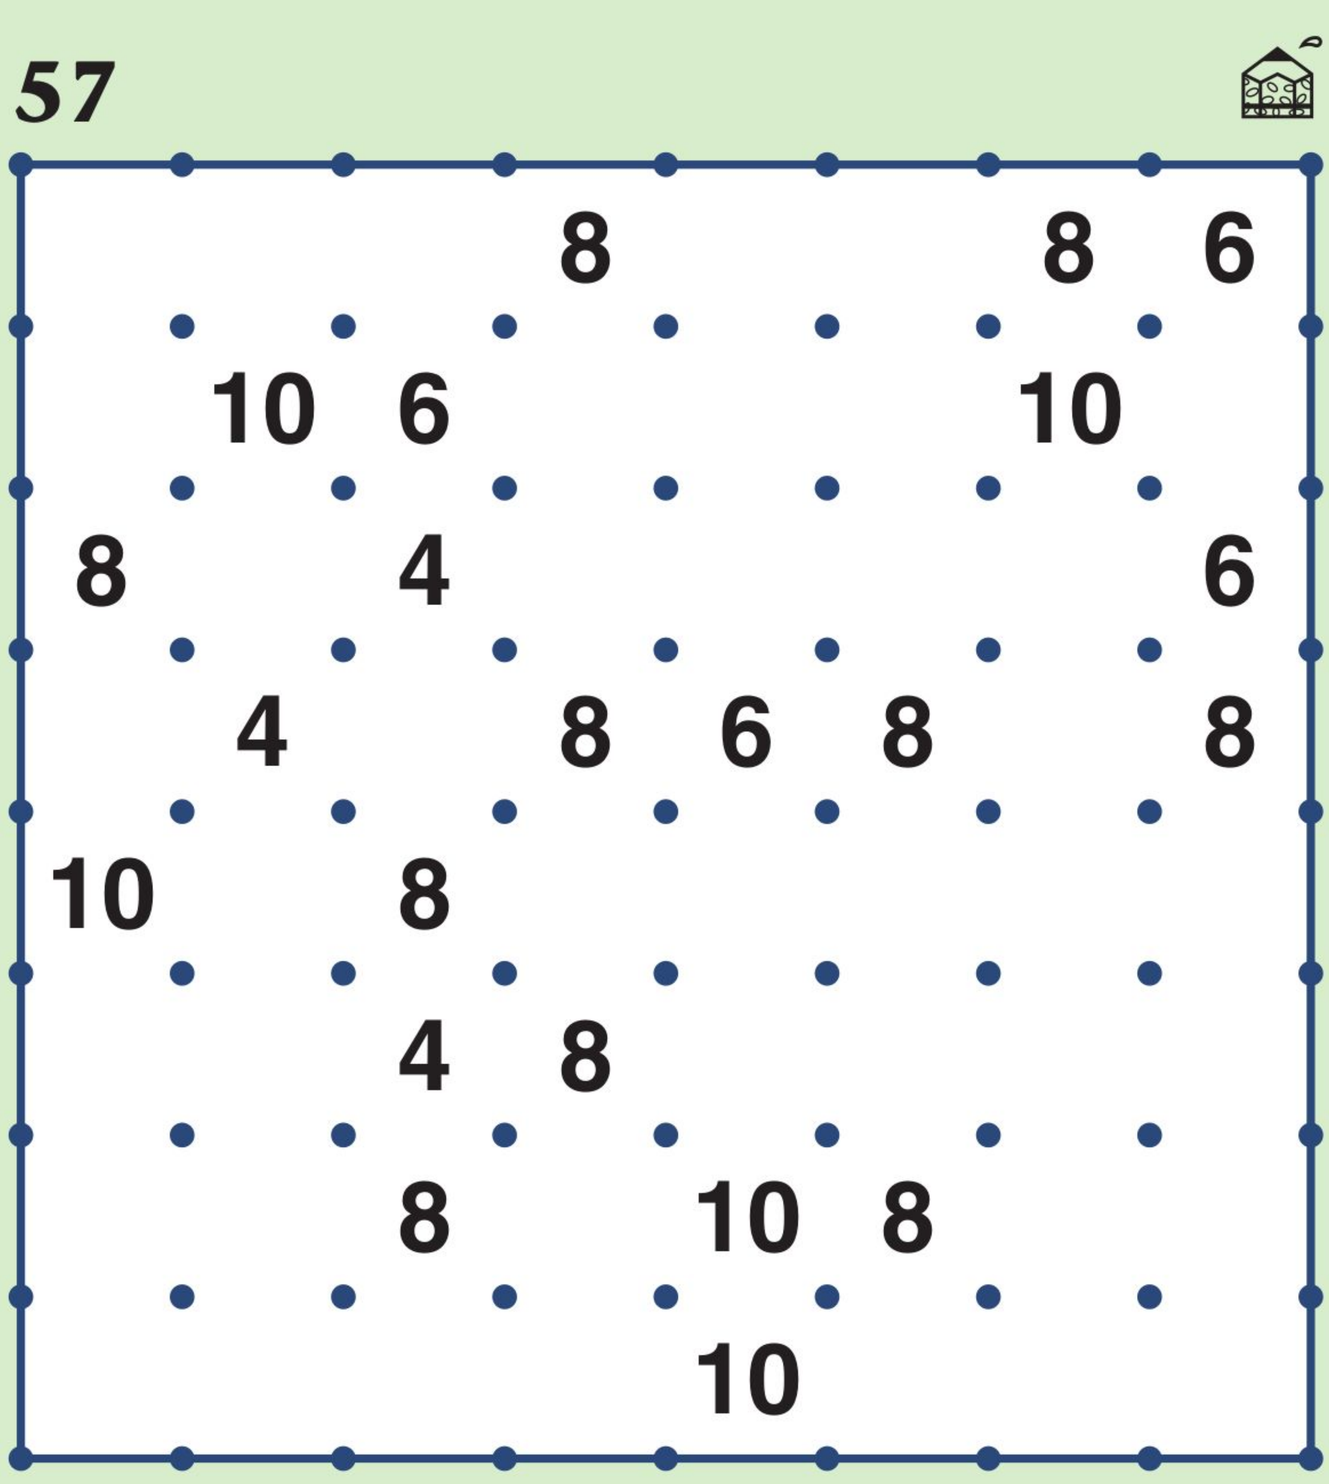

This puzzle, by Philipp Hübner, was designed and named after the remarkable labyrinthine Minoan palace on Crete.

Each number must be contained in its own room. Each number tells you how many wall sections are required to construct that room. A wall section is a horizontal or vertical line between two dots. Rooms fill the entire grid.

65 Killer

This puzzle combines Sudoku and Kakuro. The normal rules of Sudoku apply. In addition, the digits in each inner shape add up to the number in the top corner of that box. No digit is repeated in an inner shape.

Full details are on page 4.

68 Loop the Loop

Join the crosses to make a single loop. Each number tells you how many lines surround it.

For full details on how to solve this puzzle, see page 4.

73 Futoshiki

This Japanese puzzle is related to Sudoku. Each line across and down must contain all the numbers 1-9.

Use the given numbers and the symbols that tell you if the digit in a cell is larger (>) or smaller (<) than the digit next to it.

80 Tatami

Like Sudoku, Tatami will challenge the versatility of the solver.

The digits 1-5 must appear **twice** in each row and column, and **once** in each inner shape. The same digits cannot be placed in cells that share an edge, but can be placed in diagonally adjacent cells.

85 Bridges

The circles are islands. The numbers tell you how many bridges are connected to each island. A maximum of two bridges can connect any two islands.

See page 4 for full details.

99 Bridges

Each circle containing a number represents an island. The object is to connect each island with vertical or horizontal bridges so that the number of bridges equals the number inside the island; there is a continuous path connecting all the islands. There can be a maximum of two bridges between two islands. Bridges cannot cross islands or other bridges. For more details on how to solve this puzzle, see page 4.

The nifty fifty!

Fifty nifty puzzles to print out at home. Visit **puzzler.com**

COMPETITION RULES: 1 Open only to people aged 18 and over and resident in the UK, Isle of Man and the Channel Islands; in addition, cash and voucher competitions are open to Eire and overseas residents and winners will receive their prize in the form of a UK Sterling cheque. Employees of Puzzler Media Ltd, their agents, suppliers, anyone professionally connected with the promotion, distributors, retailers and the immediate families of the aforementioned are ineligible. **2** One entry per household, via one entry route only. No photocopied entries or bulk applications will be accepted. Anyone deemed to be entering through improper means will be disqualified. **3** The 'How to Enter' instructions form part of the rules. Some competitions may be featured in other Puzzler Media magazines and on puzzler.com. **4** All entries must be received by the closing date specified. **5** No liability will be accepted for entries lost, damaged or delayed in the post. Proof of posting cannot be accepted as proof of receipt. **6** A winning competition entry is one that has a correct answer to the competition for which that entry has been drawn. **7** Winners will be the first correct entries selected at random from all entries received. **8** All winners must agree to future publicity. Winners' names and counties will be published. **9** Where a prize becomes unavailable, Puzzler Media Ltd reserves the right to offer an alternative prize of equal or greater value. Should the prize be deemed unsuitable by the winner, there is no cash or prize alternative. Prize values are accurate at the time of going to press. **10** All prizes including holidays are non-transferable. Please check prize is suitable before entering. **11** The draw will take place after the closing date and prize winners will be notified by post on Puzzler Media headed paper within 28 days of the closing date. Any prize returned to Puzzler Media Ltd will be disposed of six months after the closing date, after every effort has been made to contact the winner. **12** Entries must be made either on the official entry form or submitted via our website, www.puzzler.com. Follow website instructions for online entries. If entering online, only input the four letter word solution. Written entries may be declared void if applications are illegible. The editor's decision is final and no correspondence will be entered into. DO NOT enclose any other correspondence with the entry. Entry signifies acceptance of these rules. **13** A list of prize winners can be obtained by writing, enclosing an SAE, to Prize winners, Sudoku 165, Puzzler Media Ltd, Stonecroft, 69 Station Road, Redhill, Surrey, RH1 1EY, 28 days after the closing date. **14** Promoter: Puzzler Media Ltd, Stonecroft, 69 Station Road, Redhill, Surrey, RH1 1EY.
